

 **CRYPTON**[®]
EPURE

Clean again (and again).

Sustainable, cleanable, durable,
disinfectable... beautiful.

First of its kind.

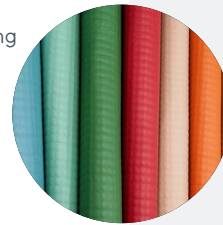

A watershed moment for environmental polyurethane (EPU).

A first-of-its-kind solvent-free, water-based polycarbonate polyurethane, Epure, packs a lot of performance (and design) into an incredibly soft, supple eco-friendly coated fabric. The latest innovation from Crypton, leading makers of performance fabric for the contract trade & residential markets, Epure is manufactured using a unique water-based process that enables it to be 100% solvent & plasticizer-free. Incredibly high-performing, Epure has extremely high abrasion, 1 million double rubs to be exact, is disinfectable, odor-resistant and extremely easy to clean resisting even upholstery's dirtiest nemesis: denim dye.

The fabric can be printed or embossed and is available in a myriad of colors.

H2oH!

- ✓ Water-based
- ✓ 100% Solvent-free
- ✓ Zero plasticizers
- ✓ 1,000,000 double rubs
- ✓ Bleach cleanable
- ✓ Disinfectable

Sustainable, cleanable, durable, disinfectable... beautiful.

The only environmental EPU that's totally free of plasticizers & solvents.

- Complies with Healthier Hospital's Safer Chemicals Guidance
- Listed on Mindful Materials
- Complies with California Section 01350
- Passes California Prop 65
- Superior stain resistance & water repellency
- Soft, supple hand
- Embossable
- Easy to clean
- Durable – exceeds 1,000,000 DR
- No Solvents, no plasticizers, PVC-free
- PFOA, PFOS, PFC, PVC – free
- No anti-microbial additive/inherently antimicrobial
- Formaldehyde, phthalate & BPA-free
- Heavy metal-free
- 'Puddle' resistant
- Bleach Cleanable (10% ratio)
- Isopropyl alcohol cleanability (70%)
- Disinfectable
